PROFILE

Product manager, 3 years. Previously two years in freight operations. Based in Mumbai.

EXPERIENCE

Product Manager, Shiprocket-adjacent SaaS (Mumbai) — Mar 2023 to present

- Own the shipment-status module used by 400+ mid-market sellers.
- Shipped a carrier-exception alert after sitting three weeks on the ops floor watching agents re-key AWB numbers by hand. Nobody asked for it; it is now part of onboarding for every new customer.
- Killed a planned white-label tracking page in month two after usage data showed 2% of sellers opened it. Wrote the memo, took the call, told the two customers who had asked for it.

Operations Analyst, Jeena & Company (freight forwarder, Mumbai) — Jun 2021 to Feb 2023

- Worked the documentation desk: bills of lading, certificates of origin, customs filings.
- Handled port-side escalations at JNPT, including physical visits when consignments were held.

EDUCATION

B.Com, Mumbai University, 2021
