PROFILE

Senior Product Manager, 7 years product, preceded by three years in warehouse and line-haul operations.

EXPERIENCE

Senior Product Manager, a large express logistics company (Mumbai) — 2021 to present

- Own the carrier and ERP integration layer: EDI feeds, port-portal connectors, customer TMS integrations.
- Made the call to stop building a bespoke connector for the second-largest customer and offer a configuration path instead. Leadership had promised the connector. I wrote the note, took the customer call, and held the line; two years on it is the standard pattern.
- Set the data-quality SLA the operations team now runs on.

Product Manager, a long-haul trucking company — 2019 to 2021

- Owned the relay-driver scheduling product. No senior PM above me.

Operations, a surface-transport company (Bhiwandi and Nagpur hubs) — 2016 to 2019

- Line-haul planning and hub exception handling. Three years on the floor.

EDUCATION

B.E. Mechanical, 2016
