SUMMARY

Senior Product Manager, 8 years, developer platforms and data infrastructure. No logistics background.

EXPERIENCE

Senior Product Manager, an API tooling company (Bengaluru; Mumbai-based) — 2021 to present

- Own the API governance layer. Sole PM for the area; no senior PM above.
- Deprecated a schema-validation service I had launched two years earlier once adoption stalled at 4%; ran the sunset and the customer communication myself.
- Introduced the review standard the wider PM team now uses.

Product Manager, a collaboration-software company — 2018 to 2021

- Owned the integrations marketplace.

EDUCATION

B.Tech, 2017
